DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference character(s) mentioned in the description: element 30 on page 4 of the specification, also the showing in figures 3 and 4 of the placement of inner surfaces 45, 46 is the opposite of that in the specification. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: the showing of element 30 in the drawings is not found.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 3 and 7-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter

Art Unit: 3723

which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification states that the diameter for inner surface 45 is smaller than that of inner surface 46, however the drawings show just the opposite.

5. Normally a claim which fails to comply with the first and/or second paragraph of § 112 will not be analyzed as to whether it is patentable over the prior art since to do so would of necessity require speculation with regard to the metes and bounds of the claimed subject matter, **In re Steele**, 308 F.2d 859, 862-63, 134 USPQ 292, (CCPA 1962) and **In re Wilson**, 424 F.2d 1382, 1385, 496 USPQ 494, 496 (CCPA 1970).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by McCabe et. al. which shows a C-shaped resilient member to engage a cap.

8. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Horton as the patent shows a C-shaped member of resilient material and inner and outer surfaces with grip enhancing ridges.

9. Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by West as the reference shows a C-shaped member with inner and outer grip enhancing ridges and an upper surface to function as a stop.

Art Unit: 3723

10. Claims 1, 2 and 4-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Morel et. al. which shows a resilient body with two C-shaped elements that are connected by "ears" that will allow a user to grip them.

11. The other references are cited only as of interest at this time. Rogers and Magarian show the use of at least two inner surfaces of different diameters and would render claims 3 and 7-10 unpatentable.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James G. Smith whose telephone number is 703-308-1746. The examiner can normally be reached on M-Th (7:05- 4:35) Fri. off.
